House Center B

Project Description

House Center B, located immediately south of Gile and Hitchcock residence halls, is a two-story, 6,900 square foot steel and wood-frame building. The first floor includes a snack bar and a 36’x48’ flexible space which can be used primarily as hang-out space but is also capable of supporting formal seating for small events. The second floor is similar to the first with a large flexible space and several smaller, more private, alcoves. The exterior spaces include a large deck and green space, allowing student activities to spill outside in the warmer months.

What is Happening

- Exterior deck framing
- Installation of second floor exterior walls panels
- Installation of second floor structural members
- Installation of roof framing
- Installation of roofing membrane
- Installation of exterior wall membrane and insulation
- Site clean-up and grass seeding to the North of Hitchcock (weather permitting)
- Installing of sidewalk sub-base materials
- Being installation of storm water management system

What to Expect

The community should expect the following activities in the coming weeks:

- Regular weekday work hours: 9:00 a.m. — 6:00 p.m.
- Some noise due to trucking of excavated materials and other activities
- Handheld electric powered tools, concrete trucks on site as required
- Some noise due to exterior wall framing – saws and nail guns
