May 16, 2008

The Dartmouth Undergraduate Journal of
Science is pleased to announce the launch of its Spring
2008 issue.

Highlights:

- Battle of the Sexes: X and Y Chromosomes
- A Celebration of the Legacy of Physics at Dartmouth
- Research: Chaos in Oscillating Chemical Reactions
- Ten Years of the DUJS

Over the past 10 years, the DUJS has published quarterly issues covering recent advances, interviews with Dartmouth scientists, and breakthrough research by undergraduates.

The DUJS serves to expose students to the peer-review process that is at the heart of science research today. In addition, students participate in the writing, editing and design of the journal. The DUJS is responsible for engaging its membership and the greater student body with scientists from the world of professional journalism. With a circulation of over 1,600 in print and 1,500 online, the DUJS looks forward to continuing to expand its science coverage in the years to come.

The Dartmouth Undergraduate Journal of Science aims to increase scientific awareness within the Dartmouth community by providing an interdisciplinary forum for sharing undergraduate research and enriching scientific knowledge.
