What's up with STIs?
(Sexually Transmitted Infections)

Every year, there are an estimated 20 Million new STI infections in the United States. Young people (15-24yo) account for 50% of the 20M new STIs in the U.S. each year.

STIs ARE Prevenetable

Many are curable and ALL are treatable.
There are steps you can take to protect you and your partner(s).

Prevention is Possible
Always play safe -
Use condoms, dental dams, or finger cots
*Visit the Safer Sex Bar on 3rd floor Robo for free safer sex products!

Get Vaccinated -
The most common STI can be prevented by a vaccine. The HPV vaccine is safe, effective, and can help you avoid HPV related health issues like warts and some cancers.

Talk with your partner(s) -
Talk w/ your partner(s) about STIs and staying safe before sexual activity.

"I really care about you so I want you to know..."

Get Yourself Tested...Regularly!
- The sooner the better
- For speedy treatment
- Respect for self & others

Dicks House offers confidential STI Testing, at no cost!
Call today for an Appt - (603)646-9440

If You Test Positive...
Getting a STI is not the end!
Many are curable & all are treatable!
~ Start Treatment ASAP
~ Tell Your Sex Partner(s)

Not sure where to start?
"Remember I told you I went to get tested the other day..."
