PREVENTIVE SERVICES:

Interim Final Rules for Non-Grandfathered Group Health Plans and Health Insurance Issuers Coverage of Preventive Services Under the Patient Protection and Affordable Care Act

January 2016

Introduction

Public Health Service (PHS) Act section 2713 and the interim final regulations require non-grandfathered group health plans and health insurance coverage offered in the individual or group market to provide benefits for and prohibit the imposition of cost-sharing requirements for the following (with respect to the individual involved):

- Evidenced – based items or services that have in effect a rating of “A” or “B” in the current recommendations of the U.S. Preventive Services Task Force (USPSTF)
- Immunizations for routine use in children, adolescents and adults that have in effect a recommendation from the Advisory Committee on Immunization Practices (ACIP) of the Centers for Disease Control and Prevention (CDC)
- For infants, children, and adolescents, evidence–informed preventive care and screenings provided for, in the comprehensive guidelines supported by the Health Resources and Services Administration (HRSA)
- For women, evidence–informed preventive care and screening provided for in the comprehensive guidelines supported by HRSA, to the extent not already included in certain recommendations of the USPSTF

Below are CVS/caremark® recommendations for coverage of preventive services without cost-sharing requirements. Please note: An exceptions process must be available for clinical circumstances that fall outside the recommended coverage - such as, for example, a request for coverage of a brand medication because the available generic medications are not medically appropriate, or a request for coverage of contraceptives or primary prevention of breast cancer for a transgender man.

### Aspirin to Prevent Morbidity and Mortality From Preeclampsia: Women

The USPSTF recommends the use of low-dose aspirin (81 mg/day) as preventive medication after 12 weeks of gestation in women who are at high risk for preeclampsia.

#### CVS/caremark Recommendation
- Women only
- Age limit ≥ 12 years
- No prior authorization
- Quantity limit of 100 units per fill
- Generic only
- OTC (requires prescription)

#### GPI Description*
**Single ingredient:** All oral dosage forms 81 mg

Includes dosage forms such as:
- Aspirin tab 81 mg
- Aspirin chew tab 81 mg
- Aspirin tab delayed release 81 mg
- Aspirin dispersible tab 81 mg

### Iron Supplements

#### Iron Supplementation in Children

The USPSTF recommends routine iron supplementation for asymptomatic children aged six to 12 months who are at increased risk for iron deficiency anemia.

#### CVS/caremark Recommendation
- Age limit six to 12 months
- No prior authorization
- No quantity limit
- Brand and generic
- Rx or OTC (requires prescription)

#### GPI Description*
**Single ingredient:** Pediatric oral liquids

- Carbonyl Iron susp 15 mg/1.25 mL
- Ferrous sulfate elixir 220 mg/5 mL
- Ferrous sulfate soln 75 mg/mL
- Ferrous sulfate syrup 300 mg/5 mL
- Iron susp. 15 mg/1.5 mL

---

## Prevention of Falls in Community-Dwelling Older Adults

**Falls Prevention in Older Adults: Vitamin D**
The USPSTF recommends vitamin D supplementation to prevent falls in community-dwelling adults age 65 years and older who are at increased risk for falls.

**CVS/caremark Recommendation**
- Age limit ≥ 65 (men and women)
- Brand and generic
- OTC (requires prescription)
- No prior authorization

**GPI Description:**
**Single ingredient: Vitamin D dosing range:**
600 IU - 800 IU (available products to meet dose range)
- Cholecalciferol cap 400 unit
- Cholecalciferol chewable tab 400 unit
- Cholecalciferol drops 400 unit/0.03 mL (per drop)
- Cholecalciferol oral liquid 1,000 unit/10 mL
- Cholecalciferol oral liquid 1,200 unit/15 mL
- Cholecalciferol oral liquid 400 unit/mL
- Cholecalciferol tab 400 unit
- Ergocalciferol tab 400 unit

## Bowel Preparation Medications

**Screening for Colorectal Cancer**
The USPSTF recommends screening for colorectal cancer (CRC) using fecal occult blood testing, sigmoidoscopy or colonoscopy, in adults, beginning at age 50 years and continuing until age 75 years.

Since colonoscopy is an option for screening, and adequate bowel preparation is required prior to the procedure, coverage of medications that will provide adequate preparation should be provided.

**CVS/caremark Recommendation**
- Age limit 50 through 74 years (men and women)
- No prior authorization or quantity limits
- Rx only
- Generics and Single Source Brands
- Generics are in *italics*. Brand-names are CAPITALIZED
- Brands until generics become available

**GPI Description**
- MOVIPREP
- PREPOPIK
- SUPREP
- Gavilyte-H Kit
- Peg-Prep Kit

WOMEN’S PREVENTIVE SERVICES:
Interim Final Rules for Non-Grandfathered Group Health Plans and Health Insurance Issuers Coverage of Preventive Services under the Patient Protection and Affordable Care Act

Introduction
On August 1, 2011, the Department of Health and Human Services (HHS) adopted Guidelines for Women’s Preventive Services – including well-woman visits, support for breast feeding equipment, contraception and domestic violence screening – that will be covered without cost sharing in non-grandfathered health plan years starting on or after August 1, 2012. The guidelines were recommended by the independent Institute of Medicine (IOM) and based on scientific evidence.

### Oral Contraceptives

<table>
<thead>
<tr>
<th>The IOM Recommended as a Preventive Service for Women:</th>
<th>CVS/caremark Recommendation</th>
</tr>
</thead>
</table>
| The full range of U.S. Food and Drug Administration (FDA)-approved contraceptive methods, sterilization procedures and patient education and counseling for women with reproductive capacity. FDA-approved OTC contraceptive methods are also recommended if prescribed for a woman by her health care provider. ¹ | • Female  
• Rx  
• Generics and single-source brands  
• Brands until generics become available |

CVS/caremark suggests a plan consider the following pharmacy-related recommendations when developing its coverage under these provisions.

CVS/caremark notes that previous HHS guidance enables plans to apply reasonable medical management techniques when developing Preventive Services coverage.

These Women’s Health Preventive Services recommendations are an addendum to the initial CVS/caremark Preventive Services recommendations issued in October 2010.

---

¹ Regardless of OTC status a prescription is required for coverage. Emergency contraception recommendation includes OTC products referenced in the IOM report.

#### Product Description*

Brand names in *italics* and in parentheses are for reference only. Only generics and single source brands are recommended for coverage without cost sharing. Brand names in *(BOLD/BLUE)* have no generic available and are recommended for coverage.

This document contains CVS/caremark recommendations to assist clients in making ACA-compliant preventive services coverage decisions as required under federal law. In addition to federal requirements, some clients may be subject to more stringent state requirements. Clients must evaluate applicable state requirements and notify CVS/caremark of any coverage modifications necessary to comply with such requirements.*
## Miscellaneous – Intrauterine Devices, Subdermal Rods & Vaginal Rings

### The IOM Recommended as a Preventive Service for Women:

The full range of FDA-approved contraceptive methods, sterilization procedures and patient education and counseling for women with reproductive capacity. FDA-approved OTC contraceptive methods are also recommended if prescribed for a woman by her health care provider.  

CVS/caremark suggests a plan consider the following pharmacy-related recommendations when developing its coverage under these provisions.

CVS/caremark notes that previous HHS guidance enables plans to apply reasonable medical management techniques when developing Preventive Services coverage.

These Women’s Health Preventive Services recommendations are an addendum to the initial CVS/caremark Preventive Services recommendations issued in October 2010.

1. Regardless of OTC status a prescription is required for coverage. Emergency contraception recommendation includes OTC products referenced in the IOM report.

  - VCF VAGINAL FOAM

---

### Primary Prevention of Breast Cancer

**Medications for Risk Reduction of Primary Breast Cancer in Women:**

The USPSTF recommends that clinicians engage in shared, informed decision-making with women who are at increased risk for breast cancer, about medications to reduce their risk. For women who are at increased risk for breast cancer and at low risk for adverse medication effects, clinicians should offer to prescribe risk-reducing medications, such as tamoxifen or raloxifene.

#### CVS/caremark Recommendation

- Female
- Age limit ≥ 35
- No prior authorization\(^2\)
- Generic only
- Rx

2. May be subject to certification process.
