Did you know that The Ohio State University Medical Center has a Summer Program for biomedical students interested in obtaining a dual MD/PhD upon graduation?

We encourage you to share the attached flyer and our website with your students: http://go.osu.edu/success

The SUCCESS Program will enable students to participate in a 9-week, fully-funded, enriching research experience hosted by the Medical Scientist Training Program. While taking part in this program, students will take valuable professional development courses and learn from engaged mentors; all while working in state-of-the-art research facilities.

The SUCCESS program seeks to identify outstanding students interested in the biomedical sciences with the goal of pursuing graduate education (MD/PhD or PhD). The program seeks to enhance and foster diversity in graduate study in the biomedical and biological sciences as reflected in culture, class, race, ethnicity, background, work, and life experiences. The program especially encourages applications from African Americans, Hispanic/Latino Americans, Native Americans, Pacific Islanders, and others whose backgrounds and experiences would bring diversity to the field.

In order to be considered for SUCCESS, students must be graduating in the year of 2015 or 2016, enrolled in a U.S. 4-year undergraduate institution, and be an American citizen or permanent resident.

Applications for the SUCCESS Program are available online now through January 31st! We do hope to hear from you again, and would love to see your students apply for this great opportunity! Feel free to forward this message to students who may find this program interesting.

Sincerely,

The SUCCESS Team
