Full-Time Clinical Research Assistant Position
Starting Spring 2015

Alzheimer’s Disease Center (BU ADC)
Boston University School of Medicine
www.bu.edu/alzresearch/

Work with a multidisciplinary team of experts in Neuropsychology, Neurology, Psychiatry, Geriatrics, Nursing, & Public Health

- Appropriate for recent bachelor’s degree graduates.
- Superb experience for individuals planning to apply to medical school or graduate school in neuropsychology, public health, or neuroscience.
- Excellent opportunity to gain clinical research experience in the areas of Alzheimer’s disease (AD) and chronic traumatic encephalopathy (CTE).
- Two-year minimum commitment.
- Play an integral role in the BU ADC, one of 27 centers around the country funded by the National Institutes of Health to conduct state-of-the-art research on AD, CTE, and related disorders.

Job Description:
- The Research Assistant will work primarily on the longitudinal HOPE study, a research registry of older individuals with and without dementia, as well as a related investigation of the long-term consequences of repetitive brain trauma in athletes, including CTE (as part of the well-known BU CTE Center). Additional opportunities to work on state-of-the-art clinical trials for AD treatments.
- Responsibilities include: administration of neuropsychological tests, interviewing caregivers, participating in multidisciplinary diagnostic conferences, and more. Opportunities for attending lectures, participating in manuscript writing, etc.
To apply, email letter and resume to:

Dr. Robert Stern, BU ADC Clinical Core Director,
Professor of Neurology, Neurosurgery, and Anatomy & Neuropathology
BU School of Medicine

Applications will be received by Kimberly Chapman
