Hello,

Do you love science and math?
Do you enjoy doing research?
Do you want to spend the summer in New York City?

If you answered yes to all of these questions, then you may be a good fit for an eight-week summer program in the Department of Biostatistics at the Columbia University Mailman School of Public Health!

In the Biostatistics Epidemiology Summer Training (BEST) Diversity Program and the Columbia Summer Institute for Training in Biostatistics (CSIBS) Program, students explore how to apply quantitative methods to investigate important health issues both in and out of the classroom. Students also get a chance to learn about opportunities for graduate study, additional training and career opportunities.

To learn more about BEST, CSIBS and program eligibility, please visit the following sites:
CSIBS: [http://www.mailman.columbia.edu/academic-departments/biostatistics/csibs-program](http://www.mailman.columbia.edu/academic-departments/biostatistics/csibs-program)

The application deadline for both programs is Friday, March 6, 2015!
