Emory University’s Office of Summer Programs is pleased to announce MD-SEE, the MD Summer Experience at Emory, for summer 2015.

Much more than a shadowing program, MD-SEE offers genuine clinical experience, classroom guidance on presentations, and a vigorous look at current issues and practices in medicine. This course will cover variable topics of special interest in the field of Clinical Neurology. Undergraduates will have an opportunity to correlate experience with actual patients with the science behind the diagnosis. During their time in the clinics, students will act as a “patient assistant,” helping patients who may have partial paralysis or loss of sensation. They will learn the basics of the Health Insurance Portability and Accountability Act (HIPAA) and will record patients’ history and neurological findings while observing real-life patient examinations. Each student will be assigned a Clinical Neurology faculty mentor who will help develop the writing and poster projects. Publication of student work will be encouraged, co-authored by the faculty mentor. This is a fantastic opportunity for students interested in medical school. I encourage you to please spread the word, forward this email on to students, post within your department, on bulletin boards around campus, and steer qualified students toward this program. Attached are two flyers that can be posted and used as handouts.

We will be begin accepting applications on **January 6, 2015**.
The preferred application deadline is **March 2, 2015**.

When: May 18 – June 26
What: An Experiential Study of Clinical Neurology
Why: Learn from a patient’s point of view, connect with a mentor, create and present a case study, and more.

What is MD-SEE?
A six-week course in Clinical Neurology. Much more than a shadowing program, MD-SEE offers genuine clinical experience, classroom guidance on presentations, and a vigorous look at current issues and practices in medicine.

Course Number: NBB 490-0PA / Credit hours: 4

Pre-requisites
- Introductory Biology, Human or Comparative Physiology and, preferably, a Neuroscience course
- Rising juniors and seniors preferred

The Program Experience
Included are morning clinical rounds, classroom lectures and special evening presentations. Likely Co- and extra-curricular activities may include tours of area hospitals, Yerkes Primate Center and the CDC, panel discussions with Emory School of Medicine faculty and students, among others. For more details, please visit our website at www.mdsummer.emory.edu.

How to apply: www.mdsummer.emory.edu

Emory undergraduates and visiting undergraduates must submit the following: MD-SEE Admission Application, transcript, one letter of recommendation (optional). Apply on our website, and find additional information for housing and financial aid.
