

SECTION 07710

MANUFACTURED ROOF SPECIALTIES

PART 1 DESIGN DIRECTIVE

1.1 DESIGN CRITERIA

A. Prefabricated Roof Specialties:

1. Snow guards are not considered by the college to be an acceptable alternate to proper design. The building must be designed with New Hampshire winters in mind. The architect must present a "variance form" to the college if there are compelling reasons to recommend snow guards.
2. Roof penetration curbs shall be designed specifically for the roof system used.
3. Roof edge fascia systems must avoid "oil canning" by use of proper gage material, backing and attachment.
4. Refer to Section 05500 regarding the need for "Roof Hooks" in certain situations.

PART 2 EXECUTION

- 2.1 No special requirements.

PART 3 EXECUTION

- 3.1 No special requirements.
