

SECTION 09511

ACOUSTICAL PANEL CEILINGS

PART 1 - DESIGN DIRECTIVES

1.1 PROJECT INCLUDES

- A. Acoustical lay-in panel ceilings, trim, and exposed metal suspension system.

1.2 QUALITY ASSURANCE

- A. Coordinate ceiling types with Granite State Electric for energy credits. Granite State Electric offers energy credits based on lighting design which require reflectance factors from ceilings. The use of certain ceiling type will either accommodate or obviate these credits. The A/E is required to review this matter and report to the Facility Planning Office representative as to the projects conformance to Granite State requirements.

1.3 DESIGN CRITERIA

- A. All acoustical ceiling tiles shall be non-combustible or class 1 fire rated.

PART 2 - PRODUCTS

- 2.1 Do not use conceded spline systems.

PART 3 - EXECUTION

- 3.1 No special requirements.
