House Center B

House Center B, located immediately south of Gile and Hitchcock residence halls, is a two-story, 6,900 square foot steel and wood-frame building. The first floor includes a 36’ x 48’ flexible space which can be used primarily as hang-out space but is also capable of supporting formal seating for small events. The second floor is similar to the first with a large flexible space and several smaller, more private, alcoves. The exterior spaces include a large deck and green space, allowing student activities to spill outside in the warmer months.

What is happening?

General work for the next two weeks includes

- Finishing the sewer line work
- Wrapping up site work on the North, East and West sides
- Digging for and setting concrete piers on the South side for the deck
- Ongoing framing
- Ongoing under slab utilities
- Tenting of the first floor and pouring the concrete slab

What to expect:

- Work Hours: weekdays only, 9:00 am – 6:00 pm
- Some noise associated with trucking of excavated materials and other activities
- Handheld electric power tools, concrete trucks on site as required
- Some noise due to exterior wall framing – saws and nail guns
