Laying the Assessment Foundation

March 29, 2010

Gavin Henning, Ph.D.
Dartmouth College
gavin.henning@dartmouth.edu

Assessment isn’t an activity.
It’s a state of mind.

Session Outcomes
- Articulate the definitions of important assessment terms
- Articulate how to align assessment
- Articulate the different types of assessment
- Articulate the importance of anchoring assessment

Definitions
- **Assessment** is any effort to gather, analyze, and interpret evidence which describes institutional, departmental, divisional, or agency effectiveness.

Definitions
- **Evaluation** is any effort to use assessment evidence to improve institutional, departmental, divisional, or agency effectiveness.

Definitions

- Assessment is the ongoing process of establishing clear, measurable expected outcomes of student learning; ensuring that students have sufficient opportunities to achieve these outcomes; systematically gathering, analyzing, and interpreting evidence to determine how well student learning matches our expectations; using the resulting information to understand and improve learning.”

Evaluation is using assessment information to make an informed judgment. OR it determines the match between intended outcomes and actual outcomes. OR it investigates and judges the quality or worth of a program, project, or other entity rather than student learning.

Definitions

- Research is the collection and analysis of data to build or confirm theory and conceptual foundations.

Assessment and Planning

- Assessment and planning are linked, intertwined, and interrelated.

- Systems thinking

- “Backward design”

- “Starting with the end”

Language of Outcomes

Mission

- Mission: A mission clarifies an organization’s purpose or why it should be doing what it does (Bryson, 2004, p. 102).

- Example: Rollins College educates students for global citizenship and responsible leadership, empowering graduates to pursue meaningful lives and productive careers.
Mission
- **Example:** Consistent with the liberal arts tradition of Dartmouth College, the Dean of the College Division builds an inclusive, thriving, and intellectually stimulating environment that fosters academic, social, cultural, and personal growth.

Mission Alignment
- **Mission:** Rollins College educates students for global citizenship and responsible leadership, empowering graduates to pursue meaningful lives and productive careers.
- Consistent with the liberal arts tradition of Dartmouth College, the Dean of the College Division builds an inclusive, thriving, and intellectually stimulating environment that fosters academic, social, cultural, and personal growth.

Mission Alignment
- Consistent with the liberal arts tradition of Dartmouth College, the Dean of the College Division builds an inclusive, thriving, and intellectually stimulating environment that fosters academic, social, cultural, and personal growth.
- The Office of Student Involvement and Leadership stands to promote citizenship, multiculturalism, and community involvement through leadership education, experiential learning opportunities, student organization involvement, and campus programming.

Goal
- **Goal:** A goal is an end result written in broad terms.
- **Example:** As a result of participating in the Emerging Leaders Program, students will increase their leadership skills.

Mission-Goal Alignment
- **Mission:** The Office of Student Involvement and Leadership stands to promote citizenship, multiculturalism, and community involvement through leadership education, experiential learning opportunities, student organization involvement, and campus programming.
- **Goal:** As a result of participating in the Emerging Leaders Program, students will increase their leadership skills.

Input
- **Input:** A raw material that is used to develop a program or intervention which can include faculty, staff, budget, facilities, technology, etc.
- **Example:** $1500, two staff members, and electronic portfolio software is available for the Emerging Leaders Program.
Outcomes

- Operational outcomes
- Learning outcomes
- Program outcomes

Operational Outcome

- **Operational Outcome**: Metrics that document how well the operational aspects of a program or activity are functioning, but do not document learning or overall impact of the program or activity.
- Example: 200 students will participate in the Emerging Leaders Program by the end of the 2009-2010 academic year.

Learning Outcome

- **Learning Outcome**: A learning outcome is the desired learning effect of a program, service, or intervention but is more specific than a goal. It is results-focused and participant centered.
- Example: As a result of participating in the Emerging Leaders Program, students will develop and hone meeting facilitation skills.

Program Outcome

- **Program Outcome**: A program outcome is the desired aggregate effect of a program, service, or intervention but is more specific than a goal.
- 80% of all students will lead a student organization during their college career.

Relationship

- **Strategy**: A strategy is a means to achieving an outcome or goal.
  - Example: In order for students to increase their meeting facilitation skills, they will identify and describe three best practices in meeting facilitation.
Action Step

- **Action step**: An action step is a way to implement a strategy to achieve an outcome or goal.

  - Example: If the strategy is to have students identify and describe three best practices in meeting facilitation, action steps might include identifying meetings to attend, developing an opportunity for reflection, developing a framework for that reflection, evaluating the experience, etc.

Language of Outcomes

- Inputs
- Goals
- Mission
- Outcomes
- Strategies
- Action steps

Assessment Ins and Outs

- Forms of assessment
- Types of assessment
- Methods/techniques of assessment

Forms of Assessment

- **Summative**: Did you get where you wanted to do? Did you accomplish your goal?
- **Formative**: Was the process to get to your outcomes successful
- **Accountability**: This is used to determine if a particular organizational activity or function should be continued, enhanced, curtailed, or eliminated. They are used for accountability and strategic planning.

Forms of Assessment

- Political assessment is used to communicate and defend a program to potential stakeholders, including professional staff, office staff, faculty, administrators, parents, tax payers, and funders.

Types of Assessment

- Tracking Usage
- Needs Assessment
- Satisfaction Study
- Culture/climate Assessment
- Outcomes Assessment
- Resource Effectiveness Study
- Benchmarking
- Program Review
- Strategic Planning

Assessment Techniques

- Surveys
- Focus groups
- Counting heads
- 1-minute papers
- Capstone project
- Portfolio

Anchoring Assessment

- Theory
- Established practice
- Professional standards
  - Council for the Advancement of Standards in Higher Education (CAS)

Assessment Cycle

- Identify outcomes
- Create learning opportunities
- Improve learning
- Gather, interpret evidence

Assessment-Planning Cycle

1. Define the issue/problem
2. Develop goal statement(s) based on problem/issue definition
3. Align assessment with mission and goals
4. Identify stakeholders
5. Specify/develop theoretical/conceptual framework for foundation for reaching the goal
6. Identify/develop measurable outcomes that would exist if goal was reached
7. Identify and measure inputs
8. Develop strategies anchored in theoretical/conceptual framework to reach goal
9. Develop action steps anchored in theoretical/conceptual framework to implement the strategies
10. Develop and measure formative assessment for strategies and action steps
11. Measure outcomes
12. Make sense of results
13. Report/present findings
14. Review/reallocate/advocate for resources
15. Retool program based on evaluation

Politics of Assessment
- Control/ownership of the issue
- Stakeholder involvement
- Position on agenda
- Resources
- Communication
- Timing
- Spin

Ethical Assessment
- Informed consent
- Voluntary participation
  - may be reason to mandate
- No repercussions for non-participation
- Confidentiality
- Minimization of risk

Resources
- Reports
- Books
- Websites

Reports
