Your Dartmouth College Retirement Plans are important benefits, so you need the right information, resources, and support to help you make decisions with confidence.

Use this guide as a resource to help you take an active role in your retirement planning regardless of which retirement provider or investment elections you choose. This guide will provide you with step-by-step instructions to access your Retirement Plans information, update your contribution amounts, choose your retirement provider and update investments.

Dartmouth College helps your retirement savings grow by contributing to the 401(a) Plan for benefits-eligible employees.* Under the 401(a), benefits-eligible employees automatically receive employer-funded contributions and become vested in the Plan after three years of service. The SRA is a voluntary plan that employees may choose to make contributions. SRA participants may be eligible for up to $3,000 in matching contributions subject to three-year vesting requirements to the 401(a) Plan.

* Your participation begins on your first day of work as a benefits-eligible regular employee if you are age 21 or older. If you are not eligible on your first day of work, your participation will begin when you meet all the eligibility requirements.

*Research Fellows are not eligible to participate in the 401(a) or SRA.

Target Date Funds are an asset mix of stocks, bonds, and other investments that automatically becomes more conservative as the fund approaches its target retirement date and beyond. Principal invested is not guaranteed.
