Join the team in Boston, MA, for 10 weeks in 22W and learn the ins and outs of how the Investment Office manages the College’s endowment.

Work alongside an experienced team and get exposure to a range of topics from asset allocation and portfolio management to evaluating investment managers and conducting due diligence. Understand how and why decisions are made.

Attend meetings and represent Dartmouth as we engage with top investors from around the world.

Tackle a capstone project over the course of the internship that can inform investment decisions for years to come. What are the prospects for electric vehicles and battery technology, and how might they impact our investments? How does China’s stock market work, who are the participants, how is it changing?

By the end of the program, you’ll have developed a foundation for investing and a set of professional skills that will serve you well in an array of careers. Past interns and analysts currently hold roles in various industries:
- Foundation/endowment/family office (COO/analyst/trustee)
- Venture capital firm (seed investor)
- Investment banks (VP/analyst)
- Management consulting (principal)
- Global tech company (product manager)
- Startup (software engineer)
- Boarding school (teacher)

**Program & Application Details**
- This is a paid opportunity based out of Boston, MA
- We are looking for 2 curious and engaged individuals who have a basic comfort with numbers. No prior investing or finance experience is needed!
- Formal application to come – if you’d like to indicate your early interest, please do so here
To support Dartmouth’s mission, the College relies on an annual distribution from the endowment, which for FY20 totaled $273M. Over the last 5 years, the endowment has contributed $1.2B.

Endowed funds contribute to a wide scope of Dartmouth’s operations, from financial aid and academic research efforts to facilities management and student life.
