Project Description (attach any supporting documents): _____

Dartmouth Project Manager: _____

Mobile Phone: _____

Construction/Vendor Company on-site Contact: _____

Mobile Phone: _____

Transportation Services policy requires any Dartmouth employee who arranges project, vendor or service work on the Dartmouth campus that may require parking, impact available parking spaces or compromise access to parking areas, to first contact Transportation Services before work commences for review and approval. The Director of Transportation Services has authority over the number of parking permits issued, parking location and access plans. Permits cannot be sold directly to contractors, vendors or service providers, unless specifically approved by the Director of Transportation Services. Policies are available for review by searching Contractors, Vendors and Service Provider Parking from the Dartmouth homepage, at Dartmouth.edu.

Start Date	End Date	Number of Permits Requested Core Campus	Number of Permits Non-core locations

Notes _____
