

Dartmouth Studies in Tropical Ecology 1992

Dartmouth College  
The Department of Biological Sciences

Edited by Jeffry L. Dudycha and Alan B. Shabel

Table of Contents

Article	Page
Introduction	iv
List of Participants	v
Program Schedule	vi
Acknowledgments	vii
Costa Rica	
Palo Verde	
The aggressiveness of three species of acacia ant	1
Differential nectar production offered to two species of ants ( <i>Pseudomyrmex ferruginea</i> and <i>P. belti</i> ) by their obligate mutualist host <i>Acacia collensii</i>	4
Differential vigor of <i>Acacia collensii</i> inhabited by <i>Pseudomyrmex belti</i> and <i>P. ferruginea</i>	7
The effect of group size on the foraging behavior of <i>Endocimus albus</i> and <i>Bubulcus ibis</i>	10
Foraging patterns of the Tropical Kingbird ( <i>Tyrannus melancholicus</i> ) in wet and dry habitats	12
Post-dispersal seed predation in a tropical dry forest	14
The effects of acacia ant presence on ant lion density	16
Epiphyte abundance and distribution in canopy trees of varying bark morphology	19
The establishment of dominance among female <i>Ctenosaura similis</i> and the effect of expanding territories on aggressive encounters	23
Insect abundance as a determinant of foraging area size in <i>Tyrannus melancholicus</i>	26
Response to nest and trail damage in arboreal colonies of <i>Nasutitermes</i>	28
Monteverde	
Aquatic communities in bromeliads: A study of island biogeography	32
Density and structure of Melastomaceous plants in high and low wind environments	36
Diurnal feeding patterns of two hummingbird species: <i>Calliphlox bryante</i> and <i>Campylopterus hemileucurus</i>	39
Factors affecting nectar robbery in two species of hummingbird pollinated flowers of similar corolla length	42
Floral mimicry in <i>Epidendrum radicans</i> , <i>Asclepias curassavica</i> , and <i>Lantana camara</i>	46
Las Cruces	
Bean biomass yield per pod of <i>Phaseolus vulgaris</i> individuals under different growing conditions	50
The edge effect in experimental <i>espequeado</i> plots	52
Effects of bracken fern abundance on bean yields	55

The performance of five potential terrace tree species in Canton Coto Brus, Costa Rica	59
<i>Corcovado</i>	
The aggressive response of <i>Atta cephalotes</i> soldiers to two types of disturbance	62
Investigation of a preference for new or old leaves in <i>Atta cephalotes</i>	65
The roles of soldiers on leaf cutter ant foraging trails	68
Selection of gap versus shade leaves by <i>Atta cephalotes</i> in Corcovado National Park, Costa Rica	71
Worker allocation in <i>Atta cephalotes</i> : Task fidelity and communication	74
A comparison of Marantaceae ( <i>Calathea</i> spp.) leaf movement in sun and shade environments	77
Composition of pelagic fish communities in pools formed during the dry season in Corcovado National Park, Costa Rica	80
Effects of height and color on flower visitation in <i>Passiflora vitifolia</i>	84
The intertidal zone: Crabs and their community	88
Shell preference in hermit crabs ( <i>Paguridae</i> )	93
Spatial distribution and resource acquisition in <i>Nephila clavipes</i>	96
<i>Finca La Selva</i>	
Fine root biomass and soil pH in tropical tree fall gaps	100
Mating patterns or forest-floor millipedes	102
Resident-win theory and foraging behavior in <i>Dendrobates pumilio</i>	105
Optimal foraging theory applied to a frugivorous fish	109
Behavioral responses of Long-Tailed Hermits ( <i>Phaethornis superciliosus</i> ) to simulated territory intrusions	115
<i>Comparative projects</i>	
A comparison of forest structure in Palo Verde, Monteverde, and Corcovado	121
A comparison of the understory avifaunal communities in three Costa Rican forests	128
Fruit morphology and seed dispersal in three Costa Rican forests	133
<b>Jamaica</b>	
The distribution of parrotfish bites on blades of <i>Thalassia testudinum</i>	137
Diurnal herbivory on <i>Thalassia testudinum</i> as a function of distance from the reef	139
Nocturnal herbivory on <i>Thalassia testudinum</i> as a function of distance from the reef	142
Selective herbivory by parrotfish on epiphyte covered turtlegrass blades	144
Sites for differential parrotfish herbivory on <i>Thalassia testudinum</i>	147
Color associations of <i>Ophiothrix suensonii</i> with <i>Haliclona rubens</i> and <i>H. hogarthi</i> sponges	149
Coral reef fish community structure as a function of substrate complexity	157
Comparison of algae at 20 and 45 foot depths in the fore reef of Discovery Bay, Jamaica	166

Distribution and behavior of <i>Bunodeopsis antillensis</i>	171
The effects of <i>Diadema antillarum</i> on two Jamaican reefs: An examination of community response	181
Foraging behavior of Spotted Goatfish ( <i>Pseudupeneus maculatus</i> ) at different stages of ontogeny	190
The role of algal cover in determining coral abundance at varying depths on a North Jamaican fore reef	194

# Participants in the Dartmouth Tropical Ecology Program 1992

## Professors

John G. Gilbert  
Richard T. Holmes  
David R. Peart

## Graduate Students

Campbell O. Webb  
Peter D. Hunt

## Undergraduates

Teri C. Balser '92	Kimberly A. Isaacs '92
Joseph J. Bizzarro '92	Jack V. Ko '92
Jennifer L. Burnaford '92	Catherine N. O'Neill '92
Jeffrey L. Dudycha '93	Jon A. Rettmann '92
Anthony L. Guerrerio '92	Alan B. Shabel '92
Erik W. Gunderson '92	Sheryl L. Soucy '92
Janis M. Hall '92	John J. Stachowicz '93
Stacey A. Wooley '91	

# The Dartmouth Tropical Ecology Program 1992 schedule

		Morning	Afternoon	Evening
2 Jan	To San Jose, C. R.	Travel	Travel, arrive SJ	Group Dinner
3 Jan	In San Jose	OTS/serpentarium	Shopping, etc.	Free
4 Jan	To Palo Verde	Travel	Orientation	Lec: Tropical diversity (ABS)
5 Jan	At Palo Verde	Orientation	20 Questions	Lec: Primates (SLS)
6 Jan	At Palo Verde	FP #1	Stat lab	Lec: History & Origins (JVK)
7 Jan	At Palo Verde	FP #2	Plant lab	FP #1 reports
8 Jan	At Palo Verde	FP #2	Vertebrate lab	Lec: Animal Sampling(EWG)
9 Jan	At Palo Verde	SIFP #1	Insect lab	FP #2 reports
10 Jan	At Palo Verde	SIFP #1	SIFP #1	Lec: Pollination-seed (Webb)
11 Jan	At Palo Verde	Comp Proj	Comp Proj	SIFP#1 reports
12 Jan	To Santa Rosa	Travel	Orientation	Field/Turtle patrol
13 Jan	At Santa Rosa	Field	Field	Field/Turtle patrol
14 Jan	To Monteverde	hike out of SR?!	Travel to MV	Lec: Bat biology(R. Laval)
15 Jan	At Monteverde	Orientation	Project planning	Lec: Coevolution (JLB)
16 Jan	At Monteverde	SIFP #2	SIFP #2	Lec: Bird ecology (SAW)
17 Jan	At Monteverde	SIFP #2	SIFP #2	Lec: Data Analysis (JAR)
18 Jan	At Monteverde	Comp Proj	Comp Proj	SIFP #2 reports
19 Jan	To San Jose	Reconnaissance	travel	free
20 Jan	In San Jose	free	free	free
21 Jan	To Palmar	Cerro de la Muerte	Travel	Group dinner-Palmar
22 Jan	To Corcovado	Travel/orientation	Orientation	Lec: Bird soc behav (CNO)
23 Jan	At Corcovado	Orientation	Organism update	Lec. Social insects (ALG)
24 Jan	At Corcovado	FP #3	FP #3	Data analysis
25 Jan	At Corcovado	SIFP #3	SIFP #3	FP #3 reports
26 Jan	At Corcovado	SIFP #3	SIFP #3	Lec: Conserv. Biology (JMH)
27 Jan	At Corcovado	Primate search	Data analysis	SIFP #3 reports
28 Jan	At Corcovado	Comp proj	Comp proj	Lec: Trop forest dyn. (JLD)
29 Jan	At Corcovado	Reconnaissance	Data analysis	SIFP #3 reports
30 Jan	To Palmar/LC	Travel	Orientation	Lec: Martha Rosenmeyer
31 Jan	At Las Cruces	Orientation	Orientation	Lec: Trop Agriculture (JJS)
1 Feb	At Las Cruces	SIFP #4	SIFP #4	Lec: Trop Forest Mgt. (JJB)
2 Feb	At Las Cruces	SIFP #4	SIFP #4	SIFP #4 reports
3 Feb	To San Jose	Travel to SJ	Travel	free
4 Feb	In San Jose	free	free	free
5 Feb	To La Selva	Travel	Orientation/Arb.	Lec: La Selva (D. Clark)
6 Feb	At La Selva	Orientation	SIFP planning	Lec: Nutr. cycl/prod. (TCB)
7 Feb	At La Selva	SIFP #5	SIFP #5	Data analysis
8 Feb	At La Selva	Comp proj	Comp proj	SIFP #5 reports
9 Feb	At La Selva	SIFP #5	SIFP #5	Data analysis
10 Feb	At La Selva	SIFP #5	Data analysis	Data analysis
11 Feb	At La Selva	Reconnaissance	Comp proj reports	SIFP #5 reports
12 Feb	To San Jose	Travel	free	Group dinner
13 Feb	Depart for Discovery Bay Marine Laboratory, Jamaica, West Indies			

Orientation = becoming acquainted with new site

Reconnaissance = time to explore site

FP = field problems

SIFP = student initiated field problems

## Acknowledgements

*At Dartmouth.* We would like to thank Peter Armstrong, Sharron Wheeler and others at the Dartmouth Off-Campus Programs office for their organization and support. We especially thank Jane Ackerman of the Dartmouth Department of Biological Sciences for deciphering our handwriting and typing the text of the book. Mary Poulson and Marjorie Audette also helped with copying and production of the final version. The photographs were taken and formatted by Tony Guerrero, Jack Ko and Sheryl Soucy.

*In Costa Rica.* We want to thank the staff of the Organization for Tropical Studies, for logistical support throughout our stay in Costa Rica. We especially thank Ana Carter and Barbara Lewis (San José) and Israel Carrera (Palo Verde). We appreciate the assistance of the staff at the Monteverde Reserve of the Tropical Science Center. There, we were lucky to have Richard LaVal give a lecture on bats. At the Wilson Botanical Garden at Las Cruces we thank Dr. Luis Gomez, Director, for his entertaining and informative tour of the gardens, and Dr. Gail Hewson for effective organization. We owe special thanks to Dr. Martha Rosenmeyer, for spending time with us at her study site and teaching us a lot about applied agricultural ecology. At the La Selva Biological station we appreciated the help and guidance of the directors, Drs. David and Deborah Clark, and the rest of the staff, especially Orlando.

*In Jamaica.* We thank the staff of the Discovery Bay Marine Laboratory, University of the West Indies. In particular, we are grateful for the expertise and lectures of Dr. Jeremy Woodley and our scuba divemaster, Peter Gayle.

The text of this book was prepared with Microsoft Word 5.0 and the graphing was done on DeltaGraph Professional 2.0. Computer illustrations were drawn in MacDraw II.
