

<i>Date</i>	<i>Time</i>	<i>Speaker's Name</i>	<i>Seminar Topic</i>	<i>Host(s)</i>
10/05/07	4PM	Elizabeth Borer , Oregon State University	Disease and Invasion: A case study in California grasslands	Lizzie Wolkovich, Kathy Cottingham
10/19/07	4PM	Åsa Berggren , Uppsala, Sweden	Colonisation ecology; results from studies on introduced species in Sweden and New Zealand	Matt Ayres
11/02/07	4PM	Phil Donoghue , University of Bristol, UK	Decoding fossil insights into embryology at the dawn of animal evolution	Kevin Peterson
11/08/07 Thursday	3PM	Michael Gilchrist , University of Tennessee	Combining models of protein translation and evolution to predict production rates using codon bias	Stephen Taerum
11/09/07	4PM	Gregor Fussmann , McGill University	Understanding community dynamics - From cell cycles to chemical interactions	John Gilbert

11/16/07	4PM	Barbara Peckarsky, University of Wisconsin	The Ecology of Place: Understanding the Role of Predation in Open Systems	Brad Taylor
11/26/07 MONDAY	4PM	Andrew Kern, University of California Santa Cruz	The tortoise, the hare, and everything in between: population genetics approaches for the identification of functional elements in genomes"	Mark McPeck
11/29/07 THURSDAY	10:30AM	Patricia Hunt, Washington State University	What makes a good egg go bad?	Sharon Bickel
11/30/07	4PM	Urs Schmidt-Ott, University of Chicago	Emerging models for EvoDevo studies in the insect order Diptera	Kevin Peterson
12/3/07 MONDAY	4PM	John Alroy, National Center for Ecological Analysis and Synthesis, Santa Barbara	"Biodiversity in the fossil record"	Mark McPeck
12/6/07 THURSDAY	2PM	Emily Greenfest-Allen, Bryn Mawr College	"Verifying what everybody knows: new insight into macroevolutionary trends"	Mark McPeck

**12/17/07
MONDAY**

4PM

**Alisha
Holloway,
UC Davis**

**"Evolutionary
forces shaping
genome variation:
comparative &
population
genomic
approaches"**

**Mark
McPeck**
