

Spring 2011

Date	Time	Speaker's Name	Seminar Topic	Host
4/01/11	4PM	Gregory Fournier , MIT	Life Before LUCA: Inferring Evolutionary Events from Deep Ancestral Sequence Reconstructions	Kevin Peterson
4/08/11	4PM	Jackie Vogel , McGill University	Cdk1 Phosphorylation of γ -tubulin Couples Spindle Dynamics to the Metaphase- Anaphase Transition	Roger Sloboda
4/15/11	4PM	Serita Frey , University of New Hampshire	Linking Microbial and Nutrient Cycling Dynamics in a Warmer, Fertilized World	Chelsea Vario
4/21/11*Special Seminar	2PM*Vail 614	Erfei Bi , University of Pennsylvania	Mechanism of Cytokinesis in Yeast	Brad DeMay
4/22/11	4PM	Winsor Lowe , University of Montana	Long-term Ecological and Evolutionary Dynamics in a Stream Salamander Population at the Second College Grant	Sam Fey/Lauren Culler
4/29/11	4PM	Michael Singer , Wesleyan University	The Self- medicating Caterpillar	Rebecca Irwin
5/06/11	4PM	Emma Rosi- Marshall , Cary Institute of	Linking Whole- river Carbon Cycling to Quantitative	Ramsa Chaves Ulloa

		Ecosystem Studies	Quantitative Food Webs in the Colorado River	
5/13/11	4PM	George Witman, U-Mass Medical Center	Cilia, Flagella and Disease	Christen DiPetrillo
5/17/11*Special Seminar	4PM	Tom Brutnell, Cornell University	Exploring the Dynamics of the Maize Leaf Transcriptome	Yi-Hsuan Chiang
5/20/11	4PM	Gretchen LeBuhn, San Francisco State Univ.	The Role of Emergence and Competition Structuring Bumble Bee Communities	Simone Whitecloud
5/20/11*Special Seminar	4PM*Vail 614	Bih-Hwa Shieh, Vanderbilt University Medical Center	Regulation of Drosophila Visual Signaling by Reversible Phosphorylation	Amitavo Mitra
5/27/11	4PM	Peter Moffett, University of Sherbrooke	Enjoying the Silence: the Role of Argonaute Proteins in Plant Anti-viral Responses	Eric Schaller
