Winter 2008

Winter 2008

Date	Time	Speaker's Name	Seminar Topic	Host
1/11/08	4PM	Matthew Bracken, Northeastern University, Nahant Field Station	Top-down modification of bottom-up processes in a marine community	Kathy Cottingham, Lizzie Wolkovich
1/18/08	4PM	John McCormack, University of Michigan	Evolutionary processes generating divergence in sky-islands populations of a passerine bird	Ryan Calsbeek
1/25/08	4PM	Henry John-Alder, Rutgers University	CANCELLED	Bob Cox
2/01/08	4PM	Jonathan Losos	Ecological and Evolutionary Determinants of Species Richness in West Indian Anolis Lizards	Mark McPeck
2/08/08	4PM	John Thompson, UC Santa Cruz	Coevolving Networks of Species	Mark McPeck
2/15/08	4PM	Henry John-Alder, Rutgers University	Physiology, Performance, and Fitness: Lessons from Lizards	Bob Cox
2/22/08	4PM	Adam Siepielski, Dartmouth College	Temporal and spatial variation provide insight into the evolution of a seed dispersal mutualism	Becky Irwin

2/29/08

4PM

Dan Warner,
Iowa State

The adaptive significance
of temperature-dependent
sex determination in an
Australian lizard

Ryan
Calsbeek

3/07/08

4PM

Donald Nuss,
University of
Maryland

Hypovirulence:
Mycoviruses at the
Interface of Fungal-host
Pathogenic Interactions

Stephen
Taerum
