Subject: Rennie Farm Update

Dear neighbors,

I write with an update about the ongoing work at the Rennie Farm site.

We have received approval from EPA to utilize their Remediation General Permit, which allows us to accelerate the rate at which we can treat groundwater.

We developed a set of questions and answers regarding the Rennie Farm groundwater pump-and-treat system, which can be found on our Rennie Project website under **Pump and Treat System FAQs**.

We will offer another Rennie Farm drop-in session at the site on Thursday, June 1, from 4 to 6 pm. Please join us if you have questions about the process or would like to see the new groundwater pump-and-treat system.

As always, please feel free to contact me if you have any questions or concerns.

Sincerely,
Maureen
