Subject: Message to residents of East Wheelock and Alpha Xi Delta

Dear East Wheelock Residents,

We're writing to update you on the work being done in Morton. Based on continued moisture testing, the commercial generator and drying equipment will continue to operate through this weekend and next week. Additional moisture testing will determine when the drying work is complete and the equipment can be taken out of service.

The removal of damaged building materials is also still in progress. We expect that will continue through next week as well. Once that process is complete, we will be in a position to determine the scope and timeframe for restoration work.

We will send another update next week.

Best,

Frank Roberts
Associate Vice President of FO&M

Mike Wooten
Associate Dean of Residential Life
